Custom Curriculum Eases Rotation Management

AccessMedicine's Custom Curriculum is a cutting-edge tool that enables internal medicine program directors to:

- Build curriculum-specific topics, using assessment and test elements to track individual resident or student progress
- Create a tailored reference by assembling the text, procedures, and images that match their program's unique educational structure

Residents can study procedures in detail using faculty-selected resources, as well as test themselves and track their performance.

Especially for Medical Students

Clerkship Corner includes all the content typically needed for a clerk's rotation in internal medicine. Clerkship Corner gives medical students the direction they need to maximize their time as they complete their final years of medical school.
